- The MPs helped with implementing what we learned
- The MPs were very helpful in seeing the real world implementation and applications of the concepts learned during lecture.
- The instructor was very thorough and helpful in relative course material. The course itself goes in depth on programming rather than presenting the basics.
- I think that the professor is very knowledgeable about the content being discussed in class, however, I think he has a hard time relating it to people who aren't super familiar with the content before the class. I also think for CE this course would be incredibly helpful.
- good practice materials
- Our instructor could quickly demonstrate coding problems on the board and this was very helpful. Watching the thought process of someone who was skilled and could work quickly and with ease was very impressive and informative.
- Good explanation on new concepts.
- ece
- pretty good course
- The instructer helped relieve any questions I had on course material.
- I learn a lot. But it is also a negative as it seems too much compared to the credits obtained.
- The course is well designed is does a pretty good job at conveying a large amount of information in a timely and orderly format.
- Professor was consistently clear and gave good examples of what we were learning.
- Course has a good layout.
- The mp's are very helpful in understanding the material and are fun to do.
- The instructor uses an app to ask questions and keep the class engaged
- Have online coding resources which is extremely useful.
- The instructor clearly knows the content, and is thus able to respond to any questions accordingly. The course also covers a large chunk of content, giving major insight into the intricacies of C, and C++ and LC-3 to a lesser extent.
- Good lecture slides to use for self-studying and reviewing for exams.
- Learned a lot.
- great at explaining and answering questions. very helpful and provides many examples
- Instructor put a lot of effort into slide presentations and making sure that notes were cohesive
- He knows what he is talking about
- He had a desire to teach and liked doing it
- good slides
- great at explaining concets
- He was really good using visuals to help explain/show more difficult topics
- Ece220 is definitely far more organized than ece120, although I expect this is due to the nature of the material.
- Patient

**The above are responses to the prompt: What are the major strengths of the instructor/course?**
